DESIGNED projects
inUno is an INTEGRATED SYSTEM that enables furnishing, setting up and enhancing SPACE.
inUNO is the innovative system to decorate and communicate which combines functionality, versatility and aesthetics in one basic element.

Designed and distributed thanks to Teknoline System by Studio T, the modular system is extremely flexible and configurable, it can range from free standing to wall solutions, room dividing panels to signage and displays. InUNO is a world of endless possibilities to furnish, exhibit, inform and communicate any way you like.

The aluminum protects the environment.

Aluminum is one of the most common elements on earth. Its main features are lightness, duration, non-toxicity (it’s a non-toxic material largely used to contain foods and drinks), its versatility and recyclability. Indeed aluminum is easily recyclable with a low energy content.

A single profile, high flexibility.

Structures extreme modularity and shaping. Sizes, shapes and materials, every room has its own features and thanks to inUNO system is easy to combine communication needs and furnishings. Many accessories available for a complete communication system.
